THE FIFTH DAY AT CHICAGO. How the Convention Looks, and What It Is

Doing To-Day. [SPECIAL TO THE EVENING WORLD.] CHICAGO, June 23.—The delegates cordially dislike the early morning sessions, and on this close, stuffy morning they come into the convention slowly and late.

At 10 o'clock, the hour for assembling, not one-fifth of them were on hand, and those who were looked particularly tired and There had been late and exciting caucuses

There had been late and exciting caucuses in most of the delegations and sleep had been a luxury that few had enjoyed.

The galleries were jammed beyond their capacity, just as they were yesterday, and worse, the reckless policy of issuing tickets right and left having gone on unchecked.

There is every prospect of another blustering day in and out of the convention.

Only half a dozen New Yorkers were in their seats at 10 o'clock, Judge Robertson the most punctual among them all. They had very little to say about the action of the delegation to-day, but intimated it was to be as outlined last night.

The general expectation was that to-day would see a mighty struggle and some big changes.

changes.

The talk is that the contest has narrowed down to Allison, Alger and Harrison, with the latterperhaps in the lead.

The Allison and Alger men were both very confident, claiming heavy gains from the bursted Gresham boom and from the weakening Sherman forces.

DEPEW AND HIS FAN.

They asserted that they would have sixty yotes solidly from Pennsylvania before the day was out, and that Nebraska and Minnesota had come to their rescue.

The talk among the delegates in the hall about adjournment was not very encouraging to those who are getting impatient to be home. The general opinion was that to finish the business to-day was out of the question. Very many said that even Monday would see no adjournment, and at least one session Tuesday would be necessary. One expressed a belief that a nomination would be reached to-day.

a belief that a nomination would be to-day.

Senator Hiscock and R. G. Horr, of Michigan, had a close conference on the floor before the convention came to order.

Col. Ingersoll's usual seat on the platform was vacant this morning.

Mr. Depew was a quarter of an hour late, but he got a good round of applause when he did come in.

did come in.

Several persons came into the gallery bearing flags, evidently with the idea of being ready for a repetition of last night's

demonstration.

Charles Emory Smith, of Philadelphia, was busy among the New York delegates while the Chairman was waiting for the convention to come to order. He shook hands cordially with Mr. Depew, and so did many others.

Chairman Estee had taken the chair at first, but his voice was too husky and uncertain, and when he called Senator Warner Miller, of New York, to take his place, there was

of New York, to take his place, there was hearty applause. Mr. Miller pounded the desk with sledge-hammer blows, and succeeded in getting

order.

The features of Bishop Fallow's opening prayer which attracted attention, were his netition for the President of the United States, which has not hitherto figured in the

States, which has not hitherto figured in the appeals to the throne of grace, and his eloquent reference to Gen. Sheridan.

After the prayer Warner Miller, acting Chairman, motioned to the band for music and it struck up "America."

The fourth ballot was then ordered, and "Hush! Hush!" came from the galleries, Alabama led off. She gave 1 for Depew, 7 for Alger, 2 for Harrison and 10 for Sherman yesterday. She to-day responded with Sherman 8, Alger 10, Harrison 1. One absent.

Arkansas stuck to Alger, and the Califor-Arkansas stuck to Alger, and the Califor-nians continued to plank down 16 saucy Blaine votes.

Colorado did not make much of a break.

Gresham also lost 2 votes from Connecticut, and they went in the Allison column.

McKinley, of Ohio, a talked of dark horse, arose from among the Ohio delegates and stood on a chair. He had received a vote from Connecticut. He made a manly speech, saying he was for John Sherman, and that Ohio came to the convention pledged to him.

"I cannot, with my personal sense of integrity," he shouted, "allow my name to be placed before this convention as a candidate for President. I do request, I do demand, that no delegate who does not wish to cast a reflection upon me will cast a further ballot for me." (Great applause.)

Florida balloted a large majority for Sherman. There was a break on Illinois. Three delegates ran away from Gresham and enlisted under the Harrison banner.

Indiana was solld for Harrison. Kansas joined the Blaine chorus with five votes and divided up the remainder of her votes among leaders.

Kentucky gaye one vote for Forsker and

leaders.

Kentucky gave one vote for Foraker and one for Fred Douglass, amid yells and laughter. Blaine got a few votes, Gresham lost two and Harrison scooped in a gain of two.

Gresham got a small gain from Louisiana.

Sherman received a majority of the votes of the Pelicans.

Maine divides her forces as on yesterday, and is lying low for Blaine.

THEY COMBINED AGAINST HARRISON. But the Friends of the Other Candidates Did Not Agree on Any One.

[SPECIAL TO THE EVENING WORLD.] CHICAGO, June 23.—Three days ago the friends of Depew, Harrison, Alger, Gresham and Allison were afraid of John Sherman's strength and were ready to combine at any time to prevent his nomination. The combination has now shifted, and it is organized against Harrison. It is a mighty strong combination, too. It includes Ohio, Pennsylyania, Iowa, Illinois, Michigan, Maine and the Pacific coast States, and is backed by the supporters of Sherman, Blaine, Allison, Alger and Gresham.

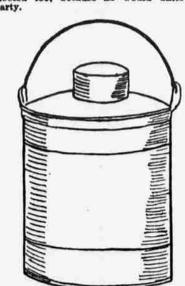

THE CENTRE OF ATTRACTION.

This anti-Harrison combination was agreed upon at 2 o'clock this morning. Among those taking part were Police Commissioner French, of New York, who represented the anti-Harrison people of the New York delegation; Edward D. Hayden, of Massachusetts; Samuel Fessenden, of Connecticut; Senator Aldrich, of Rhode Island; Congressman McKinley and Butterworth, Green B. Raum, Gen. Powell Clayton, of Arkansas; M. H. De Young, of California; Henry O. Wolcott and William A. Hamill, of Colorado; Senator Farwell, of Illinois; John S. Clarkson and Congressman Henderson, of Iowa; John S. Wise, of Virginia; Col. Hecker, of Michigan; Senator Hale, of Maine; Senator Jones, of Nevada; ex-Gov. Foster, of Ohio; John R. Lynch, of Mississipi; John M. Thurston, of Nebraska; Senator Quay, of Pennsylvania, N. W. Cuney, of Texas. setts; Samuel Fessenden, of Connecticut;

THE BLAINE MEN FAVORED ALLISON.

The claims of all the candidates were advocated by their respective friends. It was not the intention to agree on any one, and it was evident that such a result could not be schieved, Mr. Allison was highly spoken of by nearly all the representatives of what might properly be termed the Blaine element in the convention. Clarkson, of Iowa: Hayden, of Massachusetts; Cuney, of Texas; Fessenden, of Connecticut, and others insisted that he was the most available man. Senator Farwell, Lynch, of Mississippi, and one or two others declared that Judge Gresham could be nominated, and be elected too, because he would unite the party. THE BLAINE MEN FAVORED ALLISON

THE CAMPAIGN EMBYEM POR GREENAM. Mr. McKinley, being bound to Sherman, was not at liberty to act further than to do all he could to prevent a stampede. No attempt was made to consolidate all the forces upon any one candidate.

SHERMAN HAD NOT GIVEN UP HOPE Senator Sherman had telegraphed his friends during the afternoon that they must stand by him, and the friends of the other candidates feit under similar obligations to the gentlemen they have been supporting. It would have been impossible therefore to have combined on any one man, and if the supporters of any of the candidates went into the meeting hoping that their friend would be selected for the support of all, the hope was soon dispelled.

NO BOSSISM POR NEW YORK WANTED. The one idea expressed in the general dis-cussion was that the proposition of the bosses of New York to name the nominee must be of New York to name the nominee must be defeated first, and the other candidates take their chances of success after that. The conference to be held after adjournment to-day may have something to do with candidates. During the meeting this morning the statements Patrick Ford had been making about Harrison and the Irish vote of New York were repeated. They were to the effect that Harrison's Know-Nothing record had been investigated, and that it would be certain to alienate the whole Irish vote of New York, which was now drifting towards the Republicans.

Iteans.

This will probably stagger some of the New Yorkers who have been talking about his ability to carry New York. Taken along with the Chinese record on the Pacific Coast, it may be a significant factor. GRESHAM'S GRANGERS WILL STAND BY HIM.

The eleven Gresham men in the Minnesota delegation will not desert their favorite. They consider Judge Gresham's chances as good as ever and dectare their intention of standing by him to the end. The supporters of the other candidates do not consider Judge Gresham a factor in the convention.

Col. Ingersoll's speech last night injured what chances Gresham had. The Colonel was invited to address the convention and he

invited to address the convention, and he turned his speech into a Gresham speech. The friends of the other candidates charge Col. Ingersoll with abusing the privilege granted him. THE BLAINE FEELING GROWS STRONGER, All day long and last night the figure of laine became more and more apparent.

There is no longer any doubt that there is still a plot to nominate the Plumed Knight.

The 'Blaine or Busters' are beginning to show their hands in a nore open and above-board manner. There is now hidden away in the cellar of Convention Hall a new, huge floral picture of James G. Blaine.

The Californians have appointed a committee of fifty to carry it into the convention at a given signal.

HE THREW OUT A BLAINE EMBLEM.

at a given signal.

HE THREW OUT A BLAINE EMBLEM.

The Californians are mad. Creed Haymond told why in a stump speech last night. It was full of threats, condemnation and vigorous English.

He said that's damnable outrage had been perpetrated on the Californians and they had been insulted by a servant of the convention. The women of St. Louis had sent to the delegation a superb floral wreath as a token of their admiration for the stand taken to give to the people the only man who would win the next election. Having in their possession a fine portrait of Blaine, the two were combined, and flowers had been placed around the picture of the grandest man in the Republican party.

The delegation had been accused ever since its arrival of a desire to stampede the convention for Blaine, and so far from this being its desire, when the portrait and its flowery frame were carried to the hall, they were placed in an anteroom and covered up, so that they might cause no annoyance to the members of the convention who had other men to boom. But the picture was found by the Sergeant-at-Arms and by him thrown out of the building.

The Californians are not alone in their condemnation of Sergeant-at-Arms fitzsimmons. A more open and flagrant abuse of power than he has shown has rarely been seen. He has, with the assistance of the ushers and police, passed in hundreds and hundreds of people not entitled to admission, and crowded them on the platform and in the galleries.

It was openly charged that this was done

galleries.

It was openly charged that this was done in the interests of Gresham. He has also crowded the poor space allotted to the press with his friends.

GOUGED OUT A WOMAN'S EYE. Kate Kelly Murderously Assaulted by a Long

Island City Tough. The timely interference of neighbors pre ented another murder in Long Island City late last night. John Griffin, a young tough quarrelled with Kate Kelly, alias" Big Kate," on Borden avenue. Kate, who is a strapping big lass, was fast getting the better of her anoig issa, was fast getting the better of her antagonist, when he whipped out a murderous knife and drove it into her face several times. Neighbors hurried to her assistance and found Griffin, still with knife in hand, vowing that he would finish her. His friends congregated around him and spirited him away. The woman was removed to the station-house and her wounds were pronounced dangerous. Her right eye is gouged out. The police are looking for Griffin.

After 9 o'clock this morning almost every one in sight on lower Broadway was armed with a palm-leaf fan and a handkerchief, the former being kept in a state of rapid agitation and the latter, from frequent use in mopping perspiring brows, being as limp as an ordinary wash rag.

Orowds stood in front of the thermometer at Hudnut's and watched the red fluid inside the tube mount up towards the top of the scale, and one perspiring individual wanted to bet that it would "bust the top off" before noon.

When Sergt. Dunn came down and looked over the early reports from the West, he said he would not take back any of his predictions, and declared with the greatest confidence that he expected to see a big drop in the temperature before midnight.

THE SOTTEST JUNE ON RECORD.

"Yes." he said, as he took down a statistical table, "this is the hottest weather for June of which we have any record. The heat yesterday broke the record and to-day I expect to see the temperature higher still. The highest temperature for the 23d of June for the last seventeen years is as follows: 1872, 81 degrees: 1873, 67 degrees; 1874, 88 degrees; 1875, 75 degrees; 1876, 80 degrees; 1877, 69 degrees; 1878, 72 degrees; 1879, 82 degrees; 1880, 80 degrees; 1881, 74 degrees; 1882, 82 degrees; 1883, 86 degrees; 1884, 76 degrees; 1885, 72 degrees; 1886, 63 degrees; 1887, 69 degrees. For the 22d of June, the highest temperature on record is 89 degrees in 1884. The highest temperature for June in seventeen years was 94 degrees on the 30th in 1872, and the lowest was 60 degrees on June 10, 1878. The highest temperature registered here yesterday was 91 degrees, but of course it was higher than that down in the streets.

ABOUT THE COOL WAVE. "Last night the temperature in Manitoba was down to 40 degrees, which marks the centre of the cold wave that is to come. This morning there has been a fall of temperature all over the coast and the lake region, and it can't be very long before the wave reaches the seaboard. I look for it any time after 8 o'clock this afternoon, but it may not come till 9 or 10 o'clock to-night. At any rate, I think we can predict very respectable weather for to-morrow.

THE TROUBLESOME BUMIDITY. "What makes the heat to-day so intolerable is the humidity. The percentage this morning was 81, while the thermometer registered only 78. I say only, because it is a very unusual thing for the humidity to be so high at that temperature. The average humidity is about 65. It ought to be about 45 to-day, in order to counteract the effects of the heat."

The heat."

The temperature in New York yesterday morning at 7 o'clock was 68. To-day the mercury had a start of ten degrees above this in the race, and the probabilities are, unless the cold wave begins to strike in before 3 o'clock, we may see it 100 in the shade this afternoon.

Two more cases were reported early this morning. They were Albert Kuhn, aged forty-five, of 107 Essex street, and Jose Cot, found dead at 29 Oak street.

Assistant Coroner O'Meagher said that while the deaths in which heat is the direct cause are very numerous, those in which it sonly a contributory cause are much more so. The mortality among very young children, in particular, is very great.

Up to 11 a. M., the surface railroads reported that they had not lost any horses, though they expected great mortality if the intense heat and humidity continued much longer.

STREET CAR HORSES SUFFER.

IN THE TENEMENTS. The sudden het spell is playing havoc in the tenement-house districts, and is sending the death rate relatively as high as the mercury goes in the thermometer.

There were 144 deaths on Wednesday, 28 of which are due to the warm weather.

The average daily rate of mortality in the

city during the week has been 125, fully one-sixth being directly traceable to the heat. Yesterday there were fifteen cases of sun-stroke reported, six of which proved fatal.

ILLS BORNE ON THE HOT WAVE. The effect of the continuous heat on the general health of the city, according to Dr. Edson and Dr. Nagle, who are veteran observers, is a steady increase in diarrheal complaints and a tendency to scarlet fever, diphtheria and typhoid fever. They are on the wane, just at present, while cholers infantum, congestion and inflammation of the bowels and convulsions are on the increase. In the Bureau of Vital Statistics it is said that sickness is prevalent in those sections of that sickness is prevalent in those sections of the city where the people herd like cattle. The lack of proper ventilation and proper food make the children of the poor ready victims to the decomposition of the milk and other nourishments, and they sicken and die.

other nourishments, and they sicken and die.

"Infants brought up on the bottle suffer most," said Dr. Edsons. "The tenement-house inmates cannot afford to buy ice to keep milk cool, and the decomposition creates untold misery and consequent sickness and death. The summer corps of physicians make daily visits to the big tenements and do the best they can to save the children, but until overcrowding is done away with, and ventilation, air and sweet food are furnished, the little mounds in the gravevards will increase. It is a serious problem which health experts all over the world are trying to solve,"

THERMOMETRIC POINTS.

The following are the indications of Slakely's thermometer from 3 a. M. to-day to 11 o'clock : 3 A. M., 82 degrees; 6 A.M.; 80; 9 A.M., 86. This is a raise of ten points over last year's record for the time. At 11 o'clock it was 93½ degrees by Blakely's and 89½ by Hudnut's weather in-

Mr. Blakely says his "machine is right."

Mr. Hudnut was not seen, but is understood to be willing to back his instrument for money, marbles or chalk.

Mr. Blakely's thermometer indicates the temperature by a red zigzag line, like a schoolboy's geography waves. The tube of Hudnut's thermometer is filled with a simple red fluid, which looks like a pale claret.
